Price 10 €

ym-A52 - Tile 10x20 - Matt white glaze

Price 2 €

ym-A53 - Tile 10x20 - Platinum

Price 40 €

material

Our module size (tiles measure) is 20 x 20 cm (197 x 197 mm).

For the addition program, we also still use the dimensions 10 x 10 cm and 10 x 20 cm.

The colors are painted on the glaze and baked at 750 degrees in the kiln.

This merge the colors firmly to the glaze. We decorate tiles from the company **Villeroy & Boch**.

Pro Architectura

3107 PN00 20 x 20 matt white

3201 PN00 10 x 10 matt white

3215 PN00 10 x 20 matt white

Delft Blue:

Delft Blue is traditionally produced in the underglaze technique. The colors are applied directly on the ceramic and coated with a transparent glaze. Or the colors are on the unfired glaze (powder) painted and baked. This is also known by the majolica technique. It is **earthenware** and without a glaze not tight. The downside is the uptake of moisture in the ceramic. The glazes are often prone to crazing. -

Our tiles are **stoneware** and waterproof. You can not find the annoying hairline cracks in our products. We paint is on the baked glaze. We are convinced that we have created a better and safe product. In all the rooms, even in damp areas like bathrooms can use safely.

Individual

Our decors are arbitrarily changeable and transferable to other tile materials in color, shape and size. We also realize their desired motifs. In short: Everything is possible!
